

Light Up the Site... Quickly and Easily

www.luminite.ie

The Luminite inflatable light tower is an innovative new product designed to light large areas in less than three minutes. Rugged, portable and adaptable, it is big enough for any commercial application. It is easier to use, much faster to set up and is friendlier to the environment than traditional lighting trailers. Luminite towers reduce work site accidents, improve site safety and security, reduce theft and vandalism, improve productivity and save your company time and money. Luminite towers are in use by fire rescue, law enforcement, disaster relief agencies, construction sites, mining operations and public works projects.
